

Oracle PL/SQL Developer — Contractor

Bank of Singapore · Singapore

MAY 2026 – PRESENT

Contract engagement within the wealth management technology division, supporting the TAP Demenos platform and its integration with core banking workflows.

KEY RESPONSIBILITIES & IMPACT

- **Developing and maintaining PL/SQL components** including tables, procedures, packages, functions, and triggers to support the TAP Demenos wealth management application, ensuring seamless integration with core banking workflows.
- **Writing and optimizing complex SQL queries** for portfolio management, client reporting, and transaction processing, improving system efficiency and accuracy.
- **Performing query performance tuning** using indexes, optimizer hints, and partitioning strategies to handle large volumes of wealth management data.
- **Implementing automation scripts** for data validation, reconciliation, and audit tracking, reducing manual intervention and enhancing compliance.
- **Collaborating with cross-functional teams** to design scalable database solutions aligned with evolving wealth management requirements.
- **Conducting root cause analysis and debugging** to resolve performance bottlenecks and logical issues, ensuring system stability and client satisfaction.
- **Supporting batch job scheduling and monitoring using Control-M**, ensuring timely execution of critical wealth management processes.
- **Creating shell scripts** to automate everyday batch operations, streamlining workflows and improving operational efficiency.

CORE COMPETENCIES

Oracle PL/SQL

SQL Query Optimization

Performance Tuning

Partitioning

Data Reconciliation

Control-M

Shell Scripting
